

How to update my existing dataset within the system

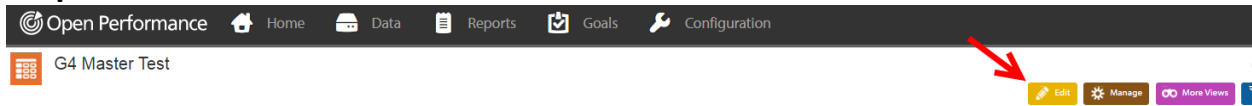

Step 1: Click on the dataset you want to update:

Manage Data

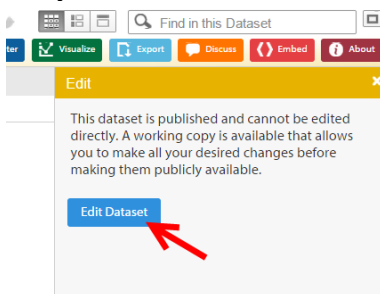

Here you will find all the data that has been uploaded by you and your organization. To add a new dataset, simply choose [Create a New Dataset](#) above to the right.

The screenshot shows the Tableau interface. The top navigation bar includes 'My Data', 'All Data', 'Recents', and a search bar. Below this, there are icons for 'Maps', 'Interact', and 'Data'. The 'All Data' section is active, displaying a list of datasets. A red arrow points to the 'G4 Master Test' dataset, which was created by 'Gov-Pannikula' 4 months ago. To the right of the dataset name, it shows 'Jul 28th Updated', '1 Rows', and '14 Columns'. A 'Show Preview' button is visible. Below this, another dataset 'G4: 2.5.b Serious Injuries - Hospitalizations_supplemental' is partially visible, showing 'Jun 16th Updated', '3 Rows', and '3 Columns'.

Step 2: Click on “Edit”

Step 3: Click on “Edit Dataset”

Step 4: Click on the desired cell and make the appropriate edits or updates.

Target
1,138,148
1,160,911
1,180,646
1,203,079

Step 5: Click on “Publish Dataset”
